Innovation in Outpatient Wound Care

A partnership with **Outpatient Integrated Strategies (OIS)** can help sustain your organization in these financially challenging times for our industry.

Our efforts with your outpatient programs will maximize savings and profitability, dramatically improve patient care and efficiency, and decrease readmission rates and the length of hospital stays.

Hospital outpatient wound care programs can become costly for facilities—and financial liabilities for health systems—when they are stuck in a never-ending cycle.

A Partnership with OIS

You determine the services your programs need; we provide our expertise. Our customized, physician-led programs often reach profitability within three months, with wound care driving other high-value service lines.

OUR EXPERTISE

- Protocols, policies, and procedures
- Physician and clinical consulting
- Transition planning and management
- Program strategy and referral development
- Audits to retain customer revenue
- Marketing materials and training provided

YOUR PROGRAM

- Contracted only for necessary services
- You own all protocols, policies, and procedures developed specifically for the program
- EHR for data management and monitoring outcomes

What Does a Partnership with OIS Look Like?

Reach out to start a conversation and request your free comprehensive assessment. We'll work together to develop the program from scratch, benchmark and measure performance standards, and maintain operational oversight to improve efficiencies while minimizing the risk of programmatic shortcuts.
